

APPROVAL OF SERVICE SUPPLIERS

Certificate No:
AOSS0000BU2
Revision No:
3

This is to certify that

Baltic Taucherei- und Bergungsbetrieb Rostock GmbH
Rostock, Germany

is granted acceptance for
**In-water survey by diver or remotely operated vehicle , in accordance with Class
Programme DNV-CP-0628.**

This service supplier certificate will be accepted for use with all rule sets published by DNV.
See the following page(s) for details regarding application.

This Certificate is valid from 2022-09-29 to (inclusive) 2025-09-28.

This Certificate is issued on 2022-09-27.

for DNV

This document has been digitally signed and will
therefore not have handwritten signatures

Bartsch, Axel
Surveyor

This Certificate may be withdrawn if:

1. The service provided has been improperly carried out or the results improperly reported.
2. The surveyor has found any deficiencies in the accepted operating systems of the service supplier.
3. The firm has failed to inform of any major changes having effect on the quality of the service rendered.
4. The conditions listed in the certificate are changed and/or are not fulfilled.

LEGAL DISCLAIMER: Unless otherwise stated in the applicable contract with the holder of this document, or following from mandatory law, the liability of DNV AS, its parent companies and their subsidiaries as well as their officers, directors and employees ("DNV") arising from or in connection with the services rendered for the purpose of the issuance of this document or reliance thereon, whether in contract or in tort (including negligence), shall be limited to direct losses and under any circumstance be limited to 300,000 USD.

Application:

In-Water Survey and Diver Service for ships classified by DNV in presence of a DNV surveyor.

The company is approved to conduct following service(s) for DNV:

In-Water-Survey (IWS); by diver or using Submersible-Remotely-Operated-Vehicle (ROV); in accordance to the society rules for ships, mobile offshore units and equipment, for which DNV is authorized.

Remarks:

Upon a case-by-case evaluation, in-water survey on ships and mobile offshore units may be carried out as remote survey provided that the quality of data stream (video, photos, etc.) and communication through the platform SUBSEA X provides a level of assurance equivalent to the one obtained during a survey on board.

The company is responsible to comply with applicable HSE regulations as required for the relevant service and by local authorities.

In case of required measurements of rudder bearing clearances and/ or shaft clearances the company and the owner are responsible to assess the practicality and to have adequate equipment in place before conducting the inspection.
